**While you struggle** to keep a budget Congress and the Administration are debating raising taxes and fees on the oil and natural gas industry in New Mexico.

This will cost New Mexican jobs, threaten our fragile economy and jeopardize our energy security.

**The New Mexico Rally for Jobs** is an opportunity for you to send a message to our Congressional leaders.

**With 15 million people out of work, now is not the time for energy legislation that could hurt New Mexico's economy.**
